Canadian author, L.L. Abbott, introduces the third book in the Lake Pines Mystery Series just as the chill of autumn begins to settle upon readers, which she believes, is a perfect time for a mystery.

When Sebastian Crow is found murdered in his secluded cottage on Crow Island, it seems like an open and shut case of a burglary gone wrong. That is, until Dr. Kerry Dearborne arrives. A ghastly murder scene, no weapon and every access locked from the inside, her gut tells her there's something more to this murder. She soon uncovers a sinister picture of a hidden life putting only more questions in her path. Before time runs out, Kerry must catch the killer. Because if her instinct is correct, the murderer is ready to claim another victim.

Murder Of Crows gives the reader the classic elements of a whodunit bringing them along on the hunt for the truth before the killer has a chance to strike again. As with each book in the Lake Pines Mystery Series, they can be read alone or in sequence. Although the characters have layered stories that do carry forth, each murder mystery is a story in itself.

L.L. Abbott enjoyed years of Agatha Christie novels in her youth, and before that read and reread the Nancy Drew Mysteries, and revels in bringing the 'a-ha' moments to readers as they get closer to the truth and the conclusion of each mystery book.

###

L.L. Abbott is a prolific author, having self-published 12 books in the last 2 years. She has spent many years providing copywriting and web content services for small businesses across Canada while building and running a small online business herself.
